ABOUT CORNISH LITHIUM

We are a highly innovative private British mineral exploration company focussed on the sustainable extraction of lithium and other battery metals in the historically significant mining district of Cornwall, UK. Metals such as lithium are the key enablers of the transition to clean energy given their role in power storage batteries making such metals vital components of the future UK economy. The Company has secured extensive mineral rights agreements across more than 500km² of Cornwall, enabling us to use modern exploration techniques on a regional basis.

Our Purpose is to establish a strong, sustainable and environmentally responsible extraction industry in the UK for those minerals that can contribute to the global goal of decarbonisation through clean growth and a transition to a green economy.

A wide diversity of talent is required to thrive in this ever-changing industry, and we seek to embrace and strengthen diversity across the Company. We want to retain and develop our talent, hiring the best people and giving them the training and support to allow them to flourish.
